

Windows Set-Up commands for SSH-Agent using GIT BASH

Need GIT Bash for windows, the visit this web-site and download for **FREE** ?

<http://git-for-windows.github.io/>

Run these from Git BASH;

1) eval 'ssh-agent -s'

2) exec ssh-agent bash

3) ssh-add "/c/Users/<USERNAME>/.ssh/id_rsa"

(Change the <USERNAME> to match your user name and private key file name different; i.e. *id_rsa*)
